

I am writing to voice my concern over the FCC proposing that LPFM stations would take priority over current FM translator services. The FM station that I am concerned about is K-LOVE. K-LOVE is definitely an asset to the residence of our community. K-LOVE supports wholesome values and has a positive and encouraging impact on me, my community and communities all across America. In the past year I have traveled extensively for business and some for pleasure and as I talked to various people in these cities I always heard the same comments that K-LOVE has a consistent, encouraging message that reminds us of our responsibilities to be good citizens and good stewards. It is imperative that the US has such a great FM station that spreads wholesome values across the whole land.
